

(The submission should be handwritten and in a PDF format)

- 1 Define the following terms: *domain*, *attribute*, *n-tuple*, *relation schema*, *relation state*. 3
- 2 What is the difference between a key and a superkey? 1
- 3 Discuss the domain, key, entity integrity, and referential integrity constraints. 2
- 4 Consider the database state given below. Primary keys are underlined. 14

Suppose each of the following update operations is applied directly to the below database state. Discuss which integrity constraints were violated by each operation and how you can enforce these constraints to ensure no violation occurs. If an operation does not violate any constraints, briefly explain why.

- a) Insert <'D1', 'Stafford'> into Department_Locations table
- b) Insert <6, 'Stafford'> into Department_Locations table
- c) Insert <null, 'Stafford'> into Department_Locations table
- d) Update dno of John B Smith to 3 in Employee table.
- e) Delete the employee Franklin T Wong from the Employee table.
- f) Delete the third record from works_on table
- g) update pnumber of productX to 20 in project table
